ACGME Resident Survey

Each year from mid-January through early June, the ACGME requires residents and fellows to complete an online survey. This general survey, which will take residents about 10 minutes to complete, contains questions about their clinical and educational experience, as well as duty hours worked.

Response Report

The Graduation Medical Education Committee (GMEC) requires all programs to respond to all non-compliant responses that

- are greater than 15% or
- have two or more responses, for programs with less than seven responding residents/fellows

The GME office will prepare the response form and send it to the program director. The GMEC Executive Committee will review the responses and decide if the program director needs to give a personal report to the GMEC.
