Registration, refreshments and resource tables open at 8:00 am

- Do you know that approximately 17% of children in the US are obese?
- Do we know what our children are eating?
- What is our role in prevention?

Objectives
1. Discuss proactive messages addressing nutrition and physical activity in children.
2. Recognize factors that influence childhood obesity.
3. Identify healthy alternatives to meet nutritional needs.
4. List available resources related to childhood obesity.

This seminar will provide professionals with information related to childhood obesity. Professionals will use this information to assist clients and their families. In addition, participants will learn about locally available resources related to childhood obesity prevention.
