

March 10, 2020

Dear Colleagues,

Many medical schools, universities, organizations and cities are now experiencing travel restrictions along with other measures of “social distancing” due to the spread of Coronavirus Disease (COVID-19). We have therefore made the decision to cancel the April 21, 2020 workshop, **“Lecture Free for GenZ: An Introduction to Peer Instruction.”** We plan to reschedule this workshop in the fall 2020. Date is yet to be determined (late September or early October).

For those of you who have registered for the workshop, if you would like a refund, please e-mail to let us know at: BSOM_FacDev@wright.edu
Or, you may keep your registration for the rescheduled fall date.

Thank you in advance for your understanding. Please contact me if you have any questions or concerns.

Sincerely,

Brenda Roman, MD

Lecture Free for GenZ:
An Introduction to Peer Instruction

Peer Instruction is an established and proven teaching/learning strategy in mathematics and physics. The Boonshoft School of Medicine "field tested" it for two years before incorporating it as one of three teaching/learning strategies for an entirely new curriculum — the WrightCurriculum — in 2017. The WrightCurriculum is lecture-free and Peer Instruction comprises about 60 percent of classroom time. As discovered in mathematics and physics, student achievement has been robust, in large part because the strategy uses and reinforces practice principles of the science of learning. In addition, from what we know about GenZ, it is a pedagogical fit for their learning preferences.

You are invited to learn from the best, experienced, and dynamic one day event:

- How can students learn from each other?
- Can it work in your classroom?
- How do you get started?
- Why not?

In this workshop you will:

- Watch a "Live Stream" Peer Instruction session with interactive interpretation by teaching faculty and students
- Learn about the "Student Experience" during a lunchtime student round table
- Hear "lessons learned through facilitation" from faculty, followed by a Q&A
- Participate in a Peer Instruction activity to engage with PI "first hand"

Turning Technologies will be providing devices

- Write questions for Peer Instruction sessions
