

# BSOM Summer Research Experience

May 28<sup>th</sup> to July 19<sup>th</sup>, 2024

The BSOM Summer Research Experience offers a \$2000 stipend for living expenses, with \$1000 distributed at the beginning of the experience, and \$1000 distributed after successful completion of all experience requirements.

## Eligibility:

1. BSOM students entering the summer between first and second years are eligible
2. Must be in good academic standing defined as: Needs to successfully complete MS1 coursework and exams before program begins.
3. Students who participate in the Research Experience must stay in Dayton
4. Dual degree students are not eligible to apply
5. If you are paid for your Ongoing Summer Research from other sources during this Summer Experience time, ex: grant, summer employment, you are not eligible.

## Project Expectations

- Engagement in the research project for 140 documented hours during the designated weeks.
- Reflective paper (1+ pages) submitted at the conclusion of the experience
- Abstract (250 words max) submitted at the conclusion of the experience
- With successful completion of the summer experience, presentation of the research at the BSOM Research Symposium in April of next year is highly encouraged

**There will be 2 different project tracts to select from:**

### **1. Big Data Project 140 hours over the length of Research Experience**

This experience is new this year. Up to 4 medical students will be selected to work on a group project using a national database of de-identified data as an opportunity for students to do research and learn some valuable skills over the summer. The goals are to fund highly motivated students who show interest in the available projects and to work on publication of an article on the findings.

### **2. Ongoing Project 140 hours over the length of Research Experience**

Up to 4 medical students currently engaged in research with a WSU affiliated faculty researcher will be selected for this project. The goal is to fund students who are learning valuable research skills and are highly involved in their research. A strong application will include a high quality description of the project and a recommendation from your project mentor that highlights your role in the project.

**Applications are due March 25<sup>th</sup> 2024. Decisions will be made by May 1<sup>st</sup> 2024.**

Please have **ALL** information and files ready when you open the application (see registration template attached for each of the two projects on this webpage to see what questions will be asked on the application.

Please also note, the mentor's letter of support for your application needs to be sent to [research.affairs@wright.edu](mailto:research.affairs@wright.edu)
