

Department of/Office of Pharmacology & Toxicology

Annual Report:

July 1, 2021 – June 30, 2022

Jeffrey B. Travers, MD, PhD
Professor and Chair

1

Statement from the Chair/Associate Dean

The Department has experienced a very good year as measured by success in our education, service and research missions. The faculty are unified with an enthusiastic *esprit de corps*. The level of collaboration amongst faculty is very high. A regular (3x year) newsletter and weekly “Down on the Pharm” notices to the faculty have greatly improved communication. We have undergone an alumni survey, then an external review of our educational programs followed by a faculty retreat to plan our future. The external review found that the departmental programs were successful as measured by metrics such as quality, satisfaction, and % graduation and job placement. A recent external EAB Masters Portfolio Analysis based upon labor market demand and competitive landscape variables completed for WSU Main campus in July 2022 also found that our MS programs have significant growth potential. The plan is to continue and expand our successful educational programs and to hire educational faculty to complement our research-based faculty and vibrant group of specialized adjuncts.

I will further briefly outline the Departmental accomplishments below. Please see entire document to appreciate the breadth and scope of faculty endeavors.

Educational Mission.

Academic scholarly/creative activity and teaching are essential components to the success of the departmental mission. The department thrived during and after the pandemic thanks to the department's ability to allow professors to teach courses in two or three semesters rather than one. Online classes allowed us to educate more students and contribute to our ability to meet the needs of increasing numbers of students. Allowing students to enroll in the Spring instead of only the Fall has added to our numbers, yet has resulted in the need to offer several courses at multiple times. This helped us maintain our student population, and this past year we had record numbers of MS students.

Another program that we spent a few years developing saw its first incoming class in 2020. This new Clinical Trials Coordination concentration leverages the Pharmacology and Translational Medicine Unit (PTU) for educational purposes. Given the shortages of clinically trained positions in the pharmaceutical industry, this new concentration fills an important need. The Clinical Trials Coordination Concentration is designed to give students a solid understanding of the current paradigm in clinical trials (randomized controlled trials, phase I, II and III trials, phase IV trials, adaptive trials, placebo-controlled trials) and how pharmaceutical companies are implementing meaningful changes to their clinical trial practices. The program centers around 45 contact hours at the Pharmacology Translational Unit (PTU), a separate year-long intensive course on aspects of regulatory procedures/medical writing and an investigative writing project on an area of interest to the student.

Today we are able to offer incoming students the following options:

Degrees:

- 2-year Research Track
- 2-year, 1-year, and a fully online non-thesis option
- Clinical Investigation Concentration (MD/MS) Program
- Clinical Trials Coordination Concentration MS degree
- Pipeline- HealthCare and Homeland Security MS degree

Graduate Level Certificates:

- Clinical Trials Coordination Certificate
- CBRN Defense Certificate
- Graduate General Toxicology Certificate (In partnership with the Navy Medical Research Lab, Dayton OH)
- Pipeline-Undergrad CBRN Defense program

Other:

Offering practical courses like Lean Six Sigma (With optional Green and Black Belt Certifications) and Improved relations with WPAFB/AFRL

Dr. Terry Oroszi has become Vice Chair, with her emphasis on educational programs. She has simply thrived in this role. We celebrated our 20th anniversary of our MS program this past Fall, to include a celebration that was widely attended. The festivities included one of our alumni serving as the Earl H. Morris Endowed Lecturer, as well as a fund-raising initiative that created a BSOM 20th Anniversary Student Scholarship Fund. Over two hundred members of the MS Class were in attendance and were joined by many WSU dignitaries.

Research Mission.

Research efforts are moving along well. Yongjie Xu has obtained an NIH R35 grant, and Kemp and Travers have received NIH and VA grants. The movement of part of the laboratory space of long-term faculty colleague Dr. Saber Hussain from the WPAFB into the Departmental research space has further enhanced our research infrastructure. More translational studies, both NIH/VA-funded and pharma-supported clinical trials, are in place in the PTU. Faculty in the Department have also been publishing many manuscripts, to include in high impact journals (e.g., two in the Journal of Clinical Investigation). Many continue to develop new collaborations through funding as well as publications.

Service Mission.

Departmental faculty members have also been very active in the service category. These efforts include service locally, as well as at the national level. Multiple faculty colleagues are involved in extramural grant panels. The addition of new faculty member Craig A. Rohan MD enhances the clinical services as well as adds to the educational and research missions. We also continue to assist the Department of Dermatology and funded an external expert to review their clinical operations.

The past year has been a good one and we have plans in place to make the next years even better!

2 Programs/Divisions

Name of Division or Program	Director	Dates
[Provide a description here of programs/divisions within the department including directors and participating faculty]		
Proteome Analysis Laboratory	David Cool, PhD	2004-present
Master's Program	Terry Oroszi, EdD	2008-present
Nanotoxicology Research	Saber Hussain, PhD	2010-present
CBRN Certificate Program	Terry Oroszi, EdD	2013-present
Clinical Trials Coordination Certificate Program	Terry Oroszi, EdD	2020-present
Preclinical Pharmacology Core	Yanfeng Chen, MD, PhD	2015-present
Pharmacology Translational Unit (PTU)	Jeffrey Travers, MD, PhD	2015-present

3 Fully Affiliated Faculty

Name and Academic Position	Clinical Interests	Research Interests
[list fully affiliated faculty, including statement of clinical and research interests]		
F. Javier Alvarez-Leefmans, MD, PhD, Professor		Neuroscience, molecular physiology & pharmacology, clinical neurology
Yanfang Chen, MD, PhD, Professor		Cardiovascular disease, cerebrovascular complications
David Cool, PhD, Professor, Director of Proteome Laboratory		Cellular mechanisms involve in neurodegeneration and neuroinflammation in response to diseases and chemical toxicity. Proteomic and genomic changes in response to endocrine diseases. Developing protocols and facilities for proteome, lipid and carbohydrate analysis
Mauricio Di Fulvio, PhD, Associate Professor		Diabetes
Khalid Elased, PharmD, PhD, Professor		Diabetes, cardiovascular
Saber Hussain, PhD, Professor		Nanoparticles
Mike Kemp, PhD, Assistant Professor		How human cells maintain the integrity of their genomic DNA, particularly in response to environmental genotoxins such as ultraviolet (UV) light.
Terry Oroszi, EdD, Assistant Professor Director, MS Graduate Program Director, CBRN Defense Certificate Program Co-Chair EMDP Advisory Board		Healthcare and Homeland Security (Terrorism/CBRN/Crisis Decision Making)
Craig Rohan, MD, Assistant Professor Pharm/Tox Associate Clinical Professor, Dermatology Associate Medical Director PTU Staff Physician, Dayton VA Medical Center	Translational Medicine	Clinical Trials, Wright State Pharmacology Translational Unit
Ravi Sahu, PhD, Assistant Professor		Cancer pharmacology
Courtney Sulentic, PhD, Associate Professor		Immunology

Name and Academic Position	Clinical Interests	Research Interests
Jeffrey Travers, MD, PhD, Professor and Chair Professor of Dermatology Staff Physician, Dayton VA Medical Center	Translational Medicine	Skin inflammation/cancer, lipid pharmacology Clinical Trials, Wright State Pharmacology Translational Unit
Yong-jie Xu, MD, PhD, Associate Professor		Genome integrity, signaling mechanism of replicator checkpoint

4 Teaching

Baccalaureate [any course for a bachelor's degree]

Courtney Sulentic

M&I 4260 4260 Microbiology and Immunology, Lecturer, Fall 2021.

Graduate students, including thesis supervision [master's, doctor's post-doctoral]

F. Javier Alvarez-Leefmans

PTX 7021 Effective Scientific Writing I, Director, Fall 2021
Spring semester – Sick leave

Undergraduate medical education [medical school]

David Cool

WrightQ, Beginning to End, Balance Control and Repair

Khalid Elased

WrightQ, Staying Alive Module

Craig Rohan

Dermatology lectures to MS2 class

Courtney Sulentic

WrightQ, Staying Alive Module
WrightQ, Beginning to End, Balance Control and Repair

Research Trainees

Raghiv Talreja, 4th year medical student
Shaina Ailawadi, 4th year medical student

Jeffrey Travers

No formal lecture, but teach medical students during dermatology elective and every one of three 4h clinics/week.

Graduate medical education [residents, fellows]

Craig Rohan

Clinical rotations for dermatology, pediatrics, internal medicine and family practice, 2-4 days/week

Jeffrey Travers

Lecture to residents, Hillbilly Kodachromes, Immunology I, II, 2021
Lecture to residents, Immunology III, IV, Kodachromes, 2022

Continuing medical education [grand rounds, seminars]

Craig Rohan

Seminars at Dayton Children's Medical Center, Wright Patterson Medical Center and monthly lectures to dermatology residents.

Jeffrey Travers

American Society for Photobiology Webinar

"Platelet-activating factor as a critical mediator for photobiology"

September, 2021.

Invited Speaker, Annual Meeting of the Alcohol and Immunology Research Interest Group (AIRIG) Alcohol & Tissue Injury/Organ Function Friday Loyola University Chicago Health Sciences Campus, Maywood, IL

"The Platelet-activating Factor system and microvesicle particles as effectors for intoxicated thermal burn injury pathology: Implications for environmental stressor-induced immunosuppression"

November, 2021.

University of Miami Department of Dermatology Grand Rounds

"Platelet-activating factor and microvesicle particles as critical effectors for UVB radiation"

Lecture to residents:

"An afternoon in clinic with ME!"

Miami Dermatology Society Annual Meeting

"New Insights into The Pathogenesis of Skin Cancer: Clinical Implications"

April, 2022.

Medical Education Resources, Inc., CME-approved lectures for primary care providers.

Charleston, SC- November 2021

5 Scholarly Activity

Funded grants [List PI(s), grant title, funding source, amount of award, and dates of award. Please list each grant only once. Identify student & resident authors, i.e., *=student author **=resident/fellow]

Yanfang Chen

Yanfang Chen (Co-PI), Ji Bihl, (PI), "Exosomes from MIR-Primed Endothelial Progenitor Cells for Treating Ischemic Stroke." NIH Ro1 (NHLBI, 2R01HL062996), \$1,875,000, 01/2020-11/2023.

PIs, Jeffrey B Travers and Yanfang Chen, Co-PI David Cool, Craig Rohan. "UVB radiation-generated microvesicle particles as effectors for photosensitivity." NIH R01 (NIHES031087, 04/01/2021 – 01/31/2026), \$337,500, Co-PI

Saber Hussain

Hussain, Saber. "Biosignatures discoveries of stress-Ocular Model (6.1)". \$1M, 2019-2022.

Hussain, Saber. "Biophotonic based cellular commutation & signaling (6.1)". \$0.75 M, 2020-2023.

Hussain, Saber. "Effects of Inhaled Contaminants & Stress on Lung Surfactant Function (6.2)". \$1M, 2020-2023.

Hussain, Saber. "Expanded multi-organ in vitro model in collaboration w/ Wright State Univ to support advanced medical S&T to sustain Airmen health & performance in stressful environment. Resulted academic partnership via CRADA w/WSU 2020-2023, \$1.5M equipment placed in Pharm/Tox in AFRL collaborative laboratory, train students, Synergy and partnership, enhanced medical S&T, access to talented work force.

Mike Kemp

Kemp, M (PI). "DNA damage kinase signaling in non-replicating human cells and tissues"; NIH GM130583 ~\$296,000 total costs/year, 2/1/19-1/31/24.

Kemp, M (PI). "Circadian Clock Modulating Drugs in Cancer Prevention and Treatment" Ohio Cancer Research #5020, \$30,000 total costs/year, 7/1/20-6/30/22.

Kemp, M (PI). "Mapping DNA Repair and Error-Prone DNA Synthesis in Geriatric Skin"; VA Clinical Merit 1101CX002241, ~\$220,000 total costs/year, 4/1/21-3/31/25.

Kemp, M (Co-I, sub contract). "Circadian clock disruption: A risk factor for environmental mutagenesis"; NIH ES030113, \$45,696 total costs/year, 11/01/20-10/31/24.

Craig Rohan

Principal investigator for multi-center trial involving Tapinarof.

Sub investigator on new and continuing trials involving psoriasis, prurigo Nodularis, hidradenitis suppurative and bullous pemphigoid.

Ravi Sahu

Sahu, Ravi, (PI) “Defining the novel mechanistic insights of the platelet-activating factor-receptor axis in the therapeutic potential of pancreatic cancer.”. Elsa U. Pardee Foundation Grant, \$105,771, 08/2020-09/2021.

Sahu, Ravi (Co-PI with Miller, Co-I Travers, Jeffrey, Collaborators Cool, David, Chen, Yanfeng). “Translational relevance of the PAF system in combination chemotherapy mediated microvesicle particles release.” BSoM Seed Grant RIF 223301, \$14,500, 07/2021-06/2022.

Courtney Sulentic

UES Subcontract at WPAFB, PI, in collaboration with Dr. Sean Harshman. “Utilization of Advanced Analytical Techniques and Methods for the Identification of Protein-protein Interactions of the Aryl Hydrocarbon Receptor Complex in Human Cells.”

Jeffrey Travers

Extramural awards (NIH, VA)

Travers, JB. R01 HL062996 (Travers). “Platelet-activating factor and Epidermal Cytotoxicity.” The objectives of this study are to define the role of oxidized glycerophosphocholines in UVB-mediated early responses in human and murine skin, as well as to characterize novel oxidized lipids produced in response to UVB.” NIH/NHLB, \$250,000 direct costs/year, 25% effort, 07/01/1999 to 6/30/2024. **Co-I: Cool and Sahu**

Pls, Jeffrey B Travers and Yanfang Chen, Co-PI David Cool, Craig Rohan). “UVB radiation-generated microvesicle particles as effectors for photosensitivity.” NIH R01 (NIHES031087, 04/01/2021 – 01/31/2025), \$337,500, Co-PI, 04/2021-3/2026.

Travers, JB (Basic Science VA Merit Award 510BX000853). “Oxidized lipids and UV immunosuppression>” The objective of this study is to define the role of microvesicle particles in UVB-mediated systemic immunosuppression using murine and human model systems. \$165,000 direct costs/year, 20% VA effort, 10/01/2010 to 03/31/2028.

Travers, JB (Clinical VA Merit Award 1101CX000809). “IGF-1 and the initiation of non-melanoma skin cancer.” The objectives of this grant are to test the pro-carcinogenic effects of chronic UVB on localized areas of skin on young versus geriatric subjects, and test whether localized IGF-1 is protective. In addition, the ability of topical IGF-1 inhibitor to augment procarcinogenic effects of UVB on human skin xenografted onto immunodeficient mice will be defined. \$150,000 direct costs/year, 20% VA effort, 7/01/2014 to 9/30/2023.

Travers, JB R01 ES030113 (Gaddameedhi). NIH/ES subcontract to WSU-Michael Kemp PI for subcontract. 10/06/2020-10/31/2022.

Pharma-sponsored studies

Travers, JB (Polynoma, LLC 103A-301). A Multicenter, Double-blind, Placebo-controlled, Adaptive Phase 3 Trial of POL-103A Polyvalent Melanoma Vaccine in Post-resection Melanoma Patients (Stage IIb, IIc and III) with a High Risk of Recurrence. Our Pharmacology Translational Unit is one of the participating sites. 10/01/2015 to 9/30/2021

Travers, JB (Corrona Psoriasis Registry, National Psoriasis Foundation). The Corrona Psoriasis Registry is a prospective, non-interventional, research study for patients with psoriasis under the care of a dermatologist. Target enrollment is approximately 10,000 patients with no defined upper limit on enrollment. Approximately 200 clinical dermatology clinics in North America will be recruited to participate. Our Pharmacology Translational Unit is one of the participating sites. 07/01/2016 to 06/30/2021.

Travers, JB (Eli Lilly and Company, I1F-MC-RHCD). Multicenter, Double-Blind, Randomized, Placebo-Controlled Study to Evaluate Safety, Tolerability, and Efficacy of Ixekizumab in Patients from 6 to Less than 18 Years of Age with Moderate-to-Severe Plaque Psoriasis. Our Pharmacology Translational Unit is one of the participating sites. 12/1/2016 to 02/03/2021.

Travers, JB (Eli Lilly and Company, 14V-MC-JAIW). A Phase 3, multicenter, randomized, double-blind, placebo-controlled, parallel-group, outpatient, 113-week study designed to evaluate the efficacy and safety of baricitinib 1-mg and 2-mg in patients with moderate to severe atopic dermatitis. Our Pharmacology Translational Unit is one of the participating sites. 2/20/2018 to 2/28/2021.

Travers, JB (Eli Lilly and Company 14V-MC-JAIX). A Phase 3, Multicenter, Randomized, Double-Blind, Open-Label, Parallel-Group, Outpatient, Extension study designed to evaluate the efficacy and safety of baricitinib 1-mg and 2-mg in patients with moderate to severe atopic dermatitis. Our Pharmacology Translational Unit is one of the participating sites. 4/20/2018 to 2/28/2022.

Travers, JB (Bristol-Myers Squibb Company, IM011046-BMS-986165). A Multi-Center, Randomized, Double-Blind, Placebo- and Active Comparator-Controlled Phase 3 Study to Evaluate the Efficacy and Safety of BMS-986165 in Subjects with Moderate to Severe Psoriasis. Our Pharmacology Translational Unit is one of the participating sites.
09/01/2018 to 12/01/2019; extension until 2022.

Travers, JB (Eli Lilly and Company, I6T-MC-AMAH). A Multicenter, Randomized, Double-Blind, Extension Study Comparing the Efficacy and Safety of Mirikizumab to Secukinumab in Patients with Moderate-to-Severe Plaque Psoriasis. Our Pharmacology Translational Unit is one of the participating sites. 08/01/2019 to 12/01/2021.

Travers, JB (Asana BioSciences, LLC, ASN002AD-201-EXT). An Open-Label Extension Study to Evaluate the Efficacy, Safety, Tolerability, and Pharmacokinetics of ASN002 in Subjects with Moderate to Severe Atopic Dermatitis. Our Pharmacology Translational Unit is one of the participating sites. 01/01/2019 to 12/01/2022.

Travers, JB (Celgene Corporation, CC-10004-PPSO-003). A Phase 3 Placebo Controlled Study in Pediatric Subjects from 6 to 17 Years with Moderate to Severe Plaque Psoriasis. Our Pharmacology Translational Unit is one of the participating sites. 11/01/2018 to 11/01/2021.

Travers, JB (Celgene Corporation, CC-10004-PSOR-022). A Phase 3, Multicenter, Randomized, Placebo-Controlled, Double-Blind Study of the Efficacy and Safety of Apremilast (CC-10004) in Subjects with Mild-to-Moderate Plaque Psoriasis. Our Pharmacology Translational Unit is one of the participating sites. 12/01/2018 to 12/01/2021.

Travers, JB (Eli Lilly and Company, I6T-MC-AMBK). An Open-Label Evaluation of Mirikizumab Following Subcutaneous Administration Using Prefilled Syringe or Autoinjector in Patients with Moderate-to-Severe Plaque Psoriasis. Our Pharmacology Translational Unit is one of the participating sites. 04/01/2019 to 03/01/2022.

Travers, JB (Eli Lilly and Company, WSP-07-BARI). An Investigator-Initiated Study to Evaluate the Efficacy of Baricitinib in Treatment of Delayed-type Hypersensitivity versus Irritant Skin Reactions in Healthy Adult Male Subjects. Our Pharmacology Translational Unit is the only site for this Investigator-initiated study. 06/01/2019 to 06/01/2022.

Travers, JB, Co-I; Korman, Neil, PI (Celgene). An Investigator Initiated Study of Monocyte Biomarkers in Moderate to Severe Plaque Psoriasis Subjects Treated with Apremilast. This is an investigator-initiated study in collaboration with Case Western to test the ability of oral apremilast to modify monocyte biomarkers associated with thrombosis in psoriatic subjects. Our Pharmacology Translational Unit at Wright State University is one of the sites for this study, with the other one being Case Western Reserve Department of Dermatology. 05/1/2018 to 09/1/2021.

Jeffrey Travers

Under Continuing Medical Education section.

Consultantships [sponsor activity]

David Cool

Consultant, VA Travers (PI), Funded, Consultant, "Oxidized Lipids and UV Immunosuppression", 2020-2024.

Terry Oroszi

Gerson Lehrman Group (GLG) Council member, as needed

N.S.F. Grant \$125/hr.at 80 hours of consulting on deception in clearance interviews.

Other recognition [e.g. editorships, reviewer awards]

F. Javier Alvarez-Leefmans

Associate Editor, Frontiers in Membrane Physiology and Biophysics. Frontiers Journals. Science Park PSE-D, CH-1015 Lausanne, Switzerland.

Ad hoc reviewer for the following journals during the period reported: Frontiers in Physiology, and The American Journal of Physiology-Cell Physiology.

Ad hoc grant reviewer for Wings for Life Spinal Cord Research Foundation. Salzburg, Austria. 05/16/2022 to 05/22/2022.

David Cool

NIH CounterAct Study Section Member Molecular, Cellular & Developmental Neurosciences Integrated Review Group. R21 Study Section Reviewer 10/28-29/2021.

Editorial Board, Interdisciplinary Toxicology, 2014-Present

Mauricio Di Fulvio

Ad-hoc reviewer NIH-NIDDK, Diabetes, Endocrinology, and Metabolic Diseases B Sub-committee (DDK-B).

Ad-hoc reviewer NIH-NIDDK, Special Emphasis Panel/Scientific Review Group, 2021/05, ZDK1 GRB-B (M2) 1.

Khalid Elased

Member of the Editorial Board of the Journal of Diabetes Research.

Member of the Editorial Board of World Journal of Hypertension (WJH).

Member of the Editorial Board of World Journal of Cardiology (WJC).

Member of the Editorial Board of SAJ Pharmacy & Pharmacology.

Saber Hussain

Editorial Positions:

Journal of Nanotoxicology, 2014-present

Toxicological Sciences, Associate Editor, 2010-2013

Neurotoxicology, Editorial Editor, 2009-2012.

Mike Kemp

Co-editor for special issue of Frontiers in Cell and Developmental Biology entitled: "Mechanistic Studies of Genome Integrity, Environmental Health, and Cancer Etiology.:

Reviewer, NIH Cancer Prevention Study Section (February-March 2022).

Reviewer, United Kingdom Medical Research Council Predoctoral Clinical Research Fellowship (October 2021).

Terry Oroszi

InfraGard Leadership Regional Award, 2021.

Chief Editor, InfraGard Journal, 2022.

Craig Rohan

Dayton's Best Doctors: Dayton Magazine, 2022

Ravi Sahu

Serves as an editorial board member, associate editor and reviewer for several scientific journals.

Courtney Sulentic

Lead Topic Editor for Frontiers in Toxicology, Immunotoxicology Special Topic: Role of the Aryl Hydrocarbon Receptor in Immune Modulation, 2021-2022, current views ~ 4800

Nominated by the Society of Toxicology for election ballot for the International Union of Toxicology (IUTOX) Executive Committee.

Jeffrey Travers

External Advisor, NCI SPORE grant, University of Pittsburgh, 2019-present.

Reviewer for multiple journals in areas of my expertise, ~2/month

Reviewer, VA Oncology D/E grant review panel (co-chair), 11-2021, 5-2022

Reviewer, NIAMS SBIR grant review panel 3-2022

Yongjie Xu

Ad hoc reviewer for the following journals: Genes, Cancer Letters, and Frontiers in Cell and Developmental Biology.

Other information

[Other information that represents your department's contribution to the academic mission of the Boonshoft School of Medicine.]

F. Javier Alvarez-Leefmans

In collaboration with Dr Eric Delpire (Vanderbilt SOM) and Dr Edna Kaneshiro (U. Cincinnati), I am editing and writing the 5th edition of Cell Physiology Sourcebook: Essentials of Membrane Biophysics, scheduled to be published by Elsevier Academic Press, in December 2022.

Manuscript in preparation: Cation chloride cotransporters in choroid plexus epithelial cell function: unanswered questions and controversial issues.

Preparing resubmission of paper by Patyal P., Cha, D. and Alvarez-Leefmans F.J. Expression of Na⁺, K⁺, 2Cl⁻ Cotransporter 1 and Aquaporins 4 and 7 in mouse choroid plexus and brain ependyma. Paper resubmission has been delayed as a consequence of my health issues.

Saber Hussain

Participated and advised in DURIP proposal for equipment through AFOSR
Participated in DHP-DoD proposals JPC-6 and JPC-5.

Terry Oroszi

PharmTox department external review, 2021-2022.
BSOM Faculty Senator – minute preparation.
Diversity, Equity, and Inclusion Faculty Training through BSOM, October 2021.
Invent2prevent Targeted Violence & Terrorism D.H.S. funded program for students
(Co-PI Oroszi and Co-PI Sethi) 2K budget per team.
Reworked PharmTox curriculum into distinct categories: Toxicology, Pharmacology, Career,
Pre-clinical Clinical, Leadership, and H.C.H.S. Part of an effort to change the curriculum to
a personalized degree program.
Initiate a new Healthcare and Homeland Security degree, 2022.
Hosted retired Director of NIH Assessment and Policy at a PharmTox seminar to raise awareness of
I.P. theft and new federal grant requirements.

Craig Rohan

Submitted a grant proposal in psoriasis genetics with Dr. Courtney Sulentic.

Submitted IRB investigator-initiated trial investigating the effects of imipramine on prurigenic and pain response in photodynamic therapy for actinic keratoses.

Ravi Sahu

Faculty Judge and moderator for Scholarship in Medicine (SCH) presentation day.
Faculty Judge for DAGMEC Virginia C. Woods Resident Research Forum.
Hosted rotations for incoming thesis students.
Advised several students in career planning.

Courtney Sulentic

Finalizing experiments for manuscripts and grants, writing and submitting manuscripts for publication, and grant writing.

Submitted a small foundation grant in collaborations with Drs. Travers and Rohan.

Previously submitted R01 grant, scored 21% and added new cutting-edge experiments to address comments and now must be submitted as a new grant.

Focusing my efforts on getting papers published and published an editorial based on an Immunotoxicology Special Topic for Frontiers in Toxicology for which I developed and was the Lead Topic Editor.

I rotated off the Council for the Society of Toxicology in May of 2021. In May 2022, I transitioned from President to Past President for the Women in Toxicology special interest group in the Society of Toxicology which has over 7000 national and international members.

My goals for 2022-2023 are to continue focusing effort on my research program, most specifically on publishing papers and resubmitting my R01 grant. I have communicated with my Program Officer to ensure that my grant goes to the proper study section. I am hopeful that my revised R01 grant will be funded but I will continue my efforts to expand my grant opportunities including collaborative grant opportunities. To this end I have initiated collaborations with experts inside and outside of WSU who are willing to contribute statistical, technical, genetic and bioinformatic expertise. I recently established a proteomics collaboration with Dr. Sean Harshman directly related to my current research efforts. I am looking forward to strengthening translational collaborations already initiated with Drs. Travers, Rohan, Walusimbi, and Polenakovic and identifying common research goals and potential collaborative activities with other faculty within the Pharm/Tox department and at WSU. I am currently working closely with Dr. Mike Raymer who is co-mentoring my Ph.D. student (Clayton Alex-Buckner) and providing bioinformatic expertise. I will maintain my long-standing collaboration with Dr. Saber Hussain and other scientists, including Drs. Cam Mauzy, Wanda Lyon, and Tyler Nelson at Wright Patterson Air force Base.

Jeffrey Travers

LAR advisor, 2022.
