## Goals and Objectives for Hand Rotation

## Resident Years: PGY1, PGY2, PGY4

- Workup and present a patient with common hand problems specifying the diagnosis, additional studies and treatment options. This should include the ability to take a detailed history and perform an accurate exam.
- 2. Describe the natural history of the patient's problem if untreated, treated non-operatively and treated operatively.
- 3. Correctly assist and apply dressings, casts, braces, and orthotics to protect post-operative conditions.
- 4. Demonstrate pre-op readiness by specifying the following for each case:
  - a) Surgical indications.
  - b) Incision, approach relevant anatomy and step-by-step procedure.
  - c) Expected difficulties and pitfalls.
  - d) Contingency plans.
  - e) Criteria of acceptable result.
  - f) List equipment needed for the fixation of hand and wrist fractures.
  - g) Demonstrate attention to detail in follow-up for post-op patient.
  - h) Recognize early complications.
- 5. The resident will dissect anatomic specimens during the rotation and demonstrate a thorough understanding of all anatomy and surgical approaches.
- 6. Residents will be part of a continuum of care for each particular patient.
- 7. Residents are required to participate in all didactic teaching activities at MVH.
- 8. The resident will develop technical skill in the use of cortisone injections about the hand and wrist.
