MESSAGE FROM THE CHAIR

—Lynn A. Crosby, M.D.

Greetings! I would like to take this opportunity to personally thank Dr. Ronald Lakatos for his service over the past nine years during which he has been a faculty member in the Department of Orthopaedic Surgery. Dr. Lakatos does not live in the Dayton area. He has commuted daily from Columbus, Ohio, causing him to spend over two hours a day in his car. When he took trauma call, he spent the evening on his couch in his office, or if anesthesia would allow it, would perform an elective surgical schedule through the night. He has decided to take a position at the Ohio State University Department of Orthopaedic Surgery. I applaud his decision and I know he will be successful there. I hope this allows his life to become more organized and for him to be able to spend more time with his family. We will miss him, and we wish him well.

Dr. David Shuster, who has been a resident in our department for the past three years, has decided to not continue in the orthopaedic program. This was a difficult decision for Dr. Shuster and I applaud his decision to resign and not continue in a field that was not in his interest to continue. The faculty members think highly of Dr. Shuster and wish him the best in his future endeavors.

Four new faculty members will be starting in August of 2006. Drs. Herbenick and Rubino will be returning to join the faculty after completion of their Sports Medicine Fellowships. Dr. Michael Barnett will be joining us after completion of his Foot and Ankle Fellowship. Dr. Corey Ellis will take a position in our department as a primary care sports medicine specialist with his major responsibility being taking care of the Wright State University Athletic Department. I look forward to the addition of these outstanding young men as they begin their careers as academic physicians.

With the addition of these new faculty members and the continued growth of our research department, space has once again become an issue. I look forward to working closely with the hospital and university in developing adequate future space for our laboratory, academic, and clinical needs.
Message from the Program Director

This past year our department has continued to adjust to the expansion to three residents per year. This will be the first year we will graduate three residents: Drs. Chris Anderson, Matthew Gorman, and Martin Janout. All three have done an outstanding job in their chief year. The third resident has allowed the chief residents to expand their clinical experience to include rotations at the VA Medical Center and Good Samaritan Hospital.

In September, we had our site visit and review by the Residency Review Committee. This visit was organized by Ms. Peggy Baldwin, our residency coordinator. Over the past three years, Peggy has truly embraced her job. Her attention to detail with the resident op logs, duty hours, evaluations, and rotation and conference schedules presented a comprehensive picture of our program to the RRC and resulted in our obtaining a five-year accreditation. The amount of paperwork and documentation required to maintain the Residency Program has expanded exponentially; thus we all owe Peggy a huge thanks for her efforts in managing this.

Finally, the impact of the Orthopaedic Department on medical students continues to grow. This year, we had a record seven Wright State University medical students match in orthopaedic surgery residencies. The influence that the orthopaedic faculty and residents had on these students cannot be understated. Their career choice, no doubt, was influenced by a positive experience with our department. The faculty—with full-time and clinical—residents, and staff can take great pride in the role they have played in the development of these students.

The only constant in today’s world of orthopaedic education is change. The department will continue to evolve and adjustments will be made accordingly; but the mission of training solid orthopaedic surgeons in a community-based program will remain the same.

—Richard T. Laughlin, M.D.

Dr. Laughlin Chairs Orthotics & Prosthetics Course

Due to the overwhelming success of the first annual “Clinical Applications of Orthotics & Prosthetics” course in April of 2005, the Orthopaedic Surgery Residency Program—sponsored by OrPro Prosthetics & Orthotics—hosted the second course on February 24 and 25, 2006. Originally designed for Dayton area residents, the course was opened to therapists and nurses as well.

The goal of the condensed one-and-a-half-day annual course “is to give orthopaedic residents the basic knowledge in evaluation of orthotic and prosthetic devices and prescription writing for those devices.” According to Richard T. Laughlin, M.D. who spearheaded this venture, “as an Orthopaedic Residency Program director, I believe our residents need a concise, in-depth course in orthotics and prosthetics to prepare them for their in-training exam and later their board exams. We have created a course that focuses on these subjects and how they are presented in standardized testing and clinical practice.”

Along with presentations by OrPro representatives, the course consisted of lectures by our own faculty as well as volunteer faculty who work diligently with our residency program. The Department greatly appreciates the efforts of those involved in putting this course together and looks forward to its continued success.

Dr. Albert on AAOS Board of Councilors

Michael C. Albert, M.D., volunteer faculty and 1988 alumni, presently serves as an Ohio Representative on the AAOS Board of Councilors. According to the AAOS, “Each orthopaedic surgeon who serves on the Board of Councilors acts as your representative and liaison to the Academy. A councilor’s goal is to represent your opinions, ideas, suggestions and to seek input on issues that affect orthopaedic surgeons and their patients. The Board of Councilors serves as an advisory body and resource to the Board of Directors.” Dr. Albert’s term is set to expire in 2008.

Good Luck Dr. Lakatos!

The department would like to extend congratulations to Ronald Lakatos, M.D., and his family as he begins his new job with the Ohio State University Department of Orthopaedic Surgery.

Assistant professor and chief of Orthopaedic/Spine Trauma with Wright State since 1997, Dr. Lakatos started his medical career with a Bachelor of Science in Science/Pre-Medicine from Pennsylvania State University in State College, Pennsylvania. He received his Doctor of Medicine from Hahnemann University School of Medicine in Philadelphia and began surgical residency training at Sinai Hospital of Baltimore, Maryland. After completing a Research Fellowship in the Department of Orthopaedic Surgery at the Shock Trauma Center/Maryland Institute for Emergency, Dr. Lakatos completed his orthopaedic residency training with the Division of Orthopaedic Surgery at the University of Maryland in Baltimore. He completed a Spine Fellowship with the Dallas Spine Group at Dallas Specialty Hospital and a Trauma Fellowship.
in Orthopaedic Trauma and Reconstructive Surgery at Grant Medical Center in Columbus, Ohio.

The research he has presented and published earned Dr. Lakatos two notable awards: the Henry W. Meyerding Award for Outstanding Paper for Orthopaedic Trauma in 1989, and the Edwin G. Bovill, Jr., M.D., Memorial Lecture Award at the 14th Annual Orthopaedic Trauma Association Meeting in 1998.

Dr. Lakatos is married to Jana Lakatos and has three children: Dustin, Amber, and Tessa, and they are expecting another child. We wish Dr. Lakatos and his family the best as he begins this new venture.

What a Team!

We are pleased to announce that two recent alumni will be joining our department as full-time faculty during the 2006-2007 academic year. Fellow 2005 program graduates, Michael A. Herbenick, M.D., and L. Joseph Rubino III, M.D., will be completing their Sports Medicine Fellowships at the Kerlan-Jobe Orthopedic Clinic in Los Angeles and the University of Virginia respectively.

A Dayton native, Dr. Herbenick received a Bachelor of Science in Biology, graduating magna cum laude, from the University of Dayton. As a medical student at the Wright State University School of Medicine, Dr. Herbenick studied the outcome of retrograde vs. anterograde femur nailing with Richard T. Laughlin, M.D., and the usefulness and application of diskogram in clinical practice with James T. Lehner, M.D. As a resident, Dr. Herbenick did extensive research with Matthew W. Lawless, M.D., on the effects of a cyclooxygenase-2 inhibitor on fracture healing in a rat model, which received several awards.

With a Bachelor of Science in Marketing and Sociology from Villanova University in Pennsylvania, Dr. Rubino studied pre-med at the University of Maryland in College Park, completed a one-year Intramural Research Training Award Fellowship with the National Institutes of Health, received his Doctor of Medicine from Georgetown University School of Medicine in Washington, D.C., and completed a preliminary surgery internship with the University of Virginia Health System before arriving at Wright State University School of Medicine for his residency training. Under the direction of Lynn A. Crosby, M.D., Dr. Rubino studied fatty infiltration of the rotator cuff in a rabbit model, which resulted in numerous presentations, and subluxation of the sternoclavicular joint, which was published in The Journal of Bone and Joint Surgery. His study of clavicle fractures with Matthew W. Lawless, M.D., was published on emedicine.com.

Dr. Herbenick and his wife Mary look forward to returning to their home town, while Dr. Rubino and his wife Leslie look forward to settling their children—Caroline, Julia, Elizabeth, and Joseph—in their new home.

Gregory L. Barbour, D.P.M.

Gregory L. Barbour, D.P.M., joined our department as staff podiatrist in December 2005. After earning a Bachelor of Science in Biology from Allegheny College in Meadville, Pennsylvania, in 1978, Dr. Barbour received his Doctor of Podiatric Medicine from the Ohio College of Podiatric Medicine in Cleveland in 1982, and completed his podiatric medicine and surgery residency training at Greene Memorial Hospital in Xenia, Ohio, in 1990.

After serving as a military podiatrist for 14 years at Chanute AFB in Illinois, Keesler AFB in Mississippi, and Wright-Patterson AFB in Ohio, Dr. Barbour entered private practice in 1998. During his time in the military, Dr. Barbour served as consultant to the Air Force Material Command Surgeon General.

Dr. Barbour offers comprehensive foot care for our department at satellite offices in Centerville and Vandalia.

Research Assistant Joins Department

Alison L. Manternach, R.N., M.S.A., joined our department in July of 2005 as a research assistant to Dr. Michael J. Prayson, coordinating trauma-related clinical and biomechanical studies as well as IRB and grant applications and renewals. A registered nurse at Miami Valley Hospital since 1998, Alison’s experience includes orthopaedics and neuro trauma/plastic surgery as well as research in new pain relief modalities. She also served as an alternate charge nurse and JCAHO unit representative at Miami Valley until she took over her research responsibilities.

After receiving her Bachelor of Science in Nursing from Marquette University in Milwaukee, Alison achieved a Master of Science in Administration with a concentration in Health Services from Central Michigan University at the Wright Patterson Center.

Before joining Miami Valley Hospital and our department, Alison served as a pre-admission registered nurse at the Fort Walton Beach Medical Center, Florida as well as a traveling registered nurse with Cross Country TravCorps and as an agency registered nurse with Medical Staffing Network.
Indresh Venkatarayappa, M.B.B.S.

Michael J. Prayson, M.D., director of Orthopaedic Trauma Surgery, is pleased to announce the formation of the department’s Orthopaedic Trauma Fellowship (PGY-6) Program. In March of 2006 the program welcomed its inaugural fellow, Dr. Indresh Venkatarayappa, who will train under Dr. Prayson’s guidance.

Dr. Venkatarayappa received his MBBS from Bangalore Medical College in Bangalore, India, his Diploma in Orthopedics and Fellow designation from the College of Physicians and Surgeons in Mumbai, and his Master of Surgery in Orthopedics from T.N. Medical College of Mumbai University in Mumbai. He is a member of the Royal College of Surgeons in Edinburgh and most recently worked as a senior house officer in orthopaedics at the Ravenscourt Park Hospital in London before his arrival in the United States.

David G. Lewallen, M.D.

The Fall 2005 Dayton Orthopaedic Society Meeting featured Dr. David G. Lewallen of the Mayo Clinic, Rochester, Minnesota. Dr. Lewallen’s current academic appointments include serving as program director and chair of the Adult Reconstructive Division as well as a consultant for the Department of Orthopedic Surgery at the Mayo Clinic in Rochester. He is also a professor of orthopaedics at the Mayo Clinic College of Medicine and an associate member of the Mayo School of Graduate Medical Education at the Mayo Foundation for Medical Education and Research.

At the Tuesday evening dinner meeting, Dr. Lewallen presented “New Technology in Orthopaedics—Mission, Marketing and Mayhem” and shared his knowledge of “Management of Bone Deficiency During Revision of TJA” with the residents during Grand Rounds the following morning.

After graduating magna cum laude with a Bachelor of Arts from Minnesota’s Gustavus Adolphus College and receiving his Doctor of Medicine from the University of Minnesota, Dr. Lewallen completed his residency training in orthopaedic surgery at the Mayo Graduate School of Medicine and earned a Master of Science from the University of Minnesota. He also completed Reader’s Digest International Fellowships at Chang Gung Memorial Hospital and Mennonite Christian Hospital in Taiwan, a Research Fellowship in Orthopaedic Biomechanics Laboratory at Harvard Medical School’s Beth Israel Hospital, and an AO/ASIF International Trauma Fellowship in West Germany.

With research interests in hip and knee arthroplasty and joint mechanics and kinematics, Dr. Lewallen was the winner of the Clinical Research Study Award from the Minnesota Orthopaedic Society for “Results of Uncemented Total Hip Arthroplasty in Patients with Paget’s Disease.” A member of a variety of orthopaedic committees, societies, and associations, Dr. Lewallen has served as an Editorial Advisory Board member for the Journal of American Academy of Orthopaedic Surgeons and on the Editorial Review Board for the Journal of Arthroplasty. Dr. Lewallen has a great number of publications and presentations to his credit based on his extensive research, expertise, and knowledge, and also owns multiple patents.

Dr. Crosby Wins Valley Classic Golf Tournament

Lynn A. Crosby, M.D., won First Place in Miami Valley Hospital’s 2005 Valley Classic Golf Tournament. Celebrating its 16th year, the tournament was held August 8, 2005, at the NCR Country Club with an awards dinner that evening at the Dayton Marriott. In September, the Miami Valley Hospital Foundation invited Dr. Crosby to attend their Board of Trustees meeting where he was presented with his First Place jacket.

According to the tournament’s web site, “Since its inception, the tournament has raised more than $2.1 million in support of vital patient programs and services at Miami Valley Hospital. The Valley Classic began in 1990 with 76 players...[and] raised $16,000 for the hospital’s Neonatal Intensive Care Unit. Since then, numerous patient programs and hospital units have benefited from funds raised by the tournament.”
Residents Receive Mid-America Travel Grants

Matthew T. Gorman, M.D., received a $2,500 “Education Grant for Senior Residents/Fellows to Attend the 2005 Annual Meeting” from the Mid-America Orthopaedic Association. This grant assisted Dr. Gorman in presenting “Incidence of Restore Patch Rejection Reaction in Rotator Cuff Repair Augmentation” at the annual meeting held in Amelia Island, Florida, in April 2005.

Christopher G. Anderson, M.D., received the same grant to present “Evaluation of Accumed Clavicle Plate Against 3.5mm LCDC Plate,” at the annual meeting in San Antonio, Texas, in April 2006.

Dr. Matthew Gorman Elected to AOA

Chief Resident Matthew T. Gorman, M.D., was recently elected into the Wright State University Boonshoft School of Medicine chapter of the Alpha Omega Alpha Medical Honor Society. Dr. Lynn A. Crosby presented Dr. Gorman with his membership key and certificate at the initiation dinner on April 4, 2006, at the County Club of the North in Beavercreek.

Dr. Gorman has done significant research and has had a number of articles submitted for publication this year. Most recently, he presented his scientific poster exhibit, “Infection Following Total Shoulder Arthroplasty,” at the AAOS annual meeting held in Chicago. Dr. Crosby served as faculty advisor on this study. After graduating in June, Dr. Gorman will continue his training at a Sports Medicine Fellowship at the Kerlin-Jobe Orthopaedic Clinic in Los Angeles.

Dr. Williams Wins First Place Prize for Paper

During the 2005 department graduation program, Nathan E. Williams, M.D., was presented with an award for winning first place in the 2005 Miami Valley Hospital Resident Research Paper Contest. His paper, “Preoperative Factors Affecting Knee Range of Motion After Total Knee Arthroplasty,” was co-authored by Anil B. Krishnamurthy, M.D.

Dr. Prayson Wins Third Place Prize For Paper

Dr. Michael Prayson’s paper, “Baseline Compartment Pressure Measurements in Isolated Lower Extremity Fractures Without Clinical Compartment Syndrome,” won an award at the Ohio Orthopaedic Society’s annual meeting in May of 2005 in Columbus. The third place award earned a cash prize of $500.

Department Activity at the 2006 AAOS Meeting

The department was well represented at this year’s AAOS meeting, and not just in attendance. Two of our chief residents were honored to present their scientific posters during the annual meeting. Christopher G. Anderson, M.D., presented “Shoulder Arthrodesis after Failed Shoulder Arthroplasty,” while Matthew T. Gorman, M.D., presented his poster, “Antibiotic Mixed Methylmethacrylate Covered Prosthetic Implant for the Treatment of Deep Infections in Shoulder Arthroplasty.” L. Joseph Rubino III, M.D., 2005 alumni, gave his podium presentation, “Effect of Rotator Cuff Repair with a Restore™ Patch on Fatty Infiltration in a Rabbit Model.” Department Chair Lynn A. Crosby, M.D., served as a member of the Annual Program Committee as well as chair of the Annual Meeting Exhibits Committee.

Originally scheduled to be held at the Morial Convention Center in New Orleans, the Academy scrambled to locate an alternate venue after Hurricane Katrina devastated the city in August 2005. In mid-September, it was announced the meeting would be held in March 2006 at McCormick Place in the Academy’s home town of Chicago.
Kenny B. Edwards, M.D.

“There was never any doubt of my desire to become a physician someday,” Dr. Edwards says. But it was a fellow soldier’s training accident that sparked Dr. Edwards’ interest in orthopaedic surgery. And that interest “…has only intensified with the experience and exposure that I have gained over the years.”

Having already earned an Associate of Science in Respiratory Therapy from Flagler Institute in Jacksonville, Florida, Dr. Edwards secured a Bachelor of Science in Biological Sciences/Animal Sciences from Mississippi State University in Starkville, graduating magna cum laude. He received his Doctor of Medicine from the Wright State University Boonshoft School of Medicine in May.

During his first two years in medical school at the University of Health Sciences in Kansas City, Dr. Edwards received the Diversity Scholarship Award. He also received the Best Anatomy Tutor Award, which was given by first year medical students.

As a senior hospital corpsman (HM2), Dr. Edwards began his tour of duty in the United States Navy in Great Lakes, Illinois, at the U.S. Navy Hospital Corps School. He later transferred to Naval Hospital in Jacksonville, Florida, before finishing his military obligation at the Naval Command Station in Guantanamo Bay, Cuba. He received several commendations during his time in the Navy. Prior to medical school, Dr. Edwards worked as a registered respiratory therapist in Jackson, Columbus, and Natchez, Mississippi.

On his orthopaedic surgery rotation, Dr. Edwards assisted Dr. Lynn A. Crosby in chart review and data retrieval for his research in predictors of transfusion risk in shoulder arthroplasty.

J. Adam Hamilton, M.D.

From the beginning of his medical training, Dr. Hamilton wanted to become an orthopaedic surgeon. “Orthopaedic surgeons often have a profoundly positive and obvious impact on a patient’s life. There are few things as noble as restoring lost function or alleviating pain in a patient,” he says.

Dr. Hamilton received his Doctor of Medicine from Creighton University School of Medicine in Omaha, Nebraska, in May after completing his Bachelor of Science in Biology at Macalester College in St. Paul. Dr. Hamilton’s research experience includes serving as a student researcher at the University of Minnesota School of Dentistry, a full-time educational intern for the Jesse Edwards Registry of Cardiovascular Disease at John Nassoff Heart Hospital in St. Paul, a researcher with GIKK Orthopaedic Group in Omaha, and a researcher with University of Nebraska Medical Center. He also served as a Microbiology Lab teaching assistant at Macalester. As president of the Orthopaedic Surgery Club at Creighton, he organized and moderated meetings, consulted with the faculty advisor, and worked with the University administration. Dr. Hamilton has a great deal of experience as a competitive rower and has coached rowing as well.

Brad M. Picha, M.D.

After rotating through his first month in orthopaedics, Dr. Picha realized that “this field was the perfect fit and would provide the greatest personal fulfillment.” A graduate of Denison University in Granville, Ohio, with a Bachelor of Science in Biology, Dr. Picha received his Doctor of Medicine from Case Western Reserve University School of Medicine in Cleveland in May.

Dr. Picha was a member of the pre-medical honorary society, Alpha Epsilon Delta, while at Denison University, where he was also awarded the Heritage Scholarship and the Ohio Choice Student Scholarship. As an undergrad, Dr. Picha had the opportunity to work as an emergency medical technician and firefighter. He provided first responder care and medical care and worked to extract victims involved in motor vehicle accidents and structure fires. Most recently, Dr. Picha was elected secretary of his local branch of the American Medical Association. His duties included organizing a mentoring program that matched medical students with undergraduate students who were interested in pursuing a career in medicine.

While at Denison and Case Western, Dr. Picha worked in Product Development at Applied Medical Technology as well as reviewing publications for Elsevier. Both jobs provided valuable experience that will aid him in the research and publication areas of his orthopaedic surgery residency training.
Dr. Krishnamurthy Promoted

In July of 2005, Anil B. Krishnamurthy, M.D., was promoted to associate professor in the Department of Orthopaedic Surgery and Sports Medicine. Fellowship trained in adult reconstruction, Dr. Krishnamurthy joined the department as an assistant professor in 1995 and also served as associate director of the Orthopaedic Residency at the Dayton VA Medical Center. In 1997 he was promoted to chief of Orthopaedics at the Dayton VA, where he oversees the VA rotation for our PGY-3 residents as well as the MS-IIIIs that rotate through our department. His work in Advanced Clinical Access, improving patient access to the VA Health System’s primary care and specialty clinics, has been accepted as a model nationally and is now being implemented in many other centers across the country.

Dr. Crosby Appointed North American Editor

In November of 2005, Dr. Lynn A. Crosby was honored to be appointed North American Editor for the *Journal of Shoulder and Elbow Surgery*. Dr. Crosby shares this honor with two other regional editors: Jesse Jupiter, M.D., and William Mallon, M.D. The *Journal* reviews an abundance of manuscripts every year with only the most qualified seeing publication. After converting to an electronic submission system in August 2005, the *Journal* now only accepts electronic submissions, which greatly increases the efficiency of the selection and communication process.

First Annual Resident Research and Scientific Symposium

On June 10 and 11, 2005, the department hosted its first annual resident research and scientific symposium in conjunction with the graduation exercises. Robert A. Arciero, M.D., professor in the Department of Orthopaedic Surgery and co-director of the Orthopaedic Sports Medicine Sports Medicine Fellowship at the University of Connecticut Health Center in Farmington, served as our visiting professor. Dr. Arciero presented “Chronic Medial Collateral Ligament Deficiency of the Knee” at Friday’s Resident Research Symposium and “The Post-Meniscectomized Knee” at Saturday’s Sports Medicine Symposium.

Dr. Arciero started his training at St. Bonaventure University, graduating *magna cum laude* with a Bachelor of Science in Biology and earned his Doctor of Medicine from Georgetown University School of Medicine, graduating *cum laude*. He completed his orthopaedic surgery residency training at Madigan Army Medical Center in Tacoma, Washington. He completed a Sports Medicine Fellowship under the direction of John Feagin, M.D., at Jackson Hole Orthopaedics and St. John’s Hospital in Jackson Hole, Wyoming, as well as a Sports Medicine Fellowship at the United States Military Academy at West Point. He served the U.S. Army during a 20-year military career from which he retired in 2000 as a colonel. During his commission as chief of orthopaedics at the 46th Combat Support Hospital in Saudi Arabia/Iraq during Operation Desert Shield/Storm, Dr. Arciero was awarded the Bronze Star.

Friday’s resident research presentations were followed by the annual department golf outing, held at the Heatherwoode Golf Course in Springboro, Ohio.

Chaired by Matthew W. Lawless, M.D., Saturday’s Sports Medicine Symposium featured presentations by our alumni: David Porter, M.D.; Damian Andrisani, M.D.; Matthew W. Lawless, M.D.; E. Barry McDonough, M.D.; and Dale Snead, M.D.. Two of our volunteer faculty, Drs. Timothy Quinn and Frank Mannarino, also shared their research with us.

Saturday evening featured the graduation ceremony and celebration for Drs. Michael A. Herbenick and L. Joseph Rubino, III. The graduates presented Dr. Lynn Crosby with the Resident Education Award. Dr. Herbenick chose Dr. Lawless for his Teaching Excellence Award, while Dr. Rubino awarded his to Dr. Krishnamurthy. Dr. Michael J. Prayson received the Golden Crutch Award and Drs. Matthew Gorman and Michael Herbenick were awarded the First Place ($300) and Second Place ($15) Basic Science Awards respectively.
Christopher G. Anderson, M.D.

His exposure during medical school drew Dr. Anderson to the specific field of orthopaedic surgery. With a Bachelor of Science in Zoology and Master of Science in Biological Science from Eastern Illinois University in Charleston, Illinois, Dr. Anderson received his Doctor of Medicine from the University of Wisconsin Medical School in Madison. During medical school, Dr. Anderson conducted research in the Department of Hematology and presented a scientific poster for the American Society of Hematology. Throughout his education, Dr. Anderson volunteered in various medical settings and worked as a graduate assistant with the Eastern Illinois University Athletic Department while pursuing his M.S. degree. During his orthopaedic residency training, Dr. Anderson conducted research with Dr. Crosby on humeral head and mid-shaft clavicle fractures.

Dr. Anderson and his wife Johanna Moore welcomed their first child, Dane Christopher, in 2003, and their newest addition, Nicholas Mason, in 2005. Dr. Anderson and his family will be moving to Washington State where he will be entering private practice with Northwest Orthopaedic Specialists in Spokane.

Martin Janout, M.D.

An orthopaedic resident transfer from Henry Ford Hospital in Detroit, Dr. Janout came to Wright State in 2003 in order to be in closer proximity to his wife, Dr. Karen E. Janout, who was in the midst of her ophthalmology residency training at the University of Cincinnati College of Medicine.

Dr. Janout earned a Bachelor of Arts in Biology from Carroll College in Helena, Montana, and received his Doctor of Medicine from Creighton University School of Medicine in Omaha, Nebraska, before beginning his orthopaedic residency training at Henry Ford.

In 2005, Dr. Janout was selected as an AOA/OREF Zimmer Resident Leadership Forum participant at the meeting held in Boston. In July, Dr. Janout will be presenting his research on the Achilles tendon with Dr. Laughlin at the 22nd Annual Summer Meeting of the AOFAS in La Jolla, California.

Just this past fall the Janouts welcomed their first child, Radek Carl. Dr. Janout will begin a Hand Fellowship at the Loma Linda University Medical Center in California.

Matthew T. Gorman, M.D.

His experience as a child with a pediatric orthopaedist was one of many factors that led Dr. Gorman to pursue orthopaedic surgery as a career. His hands-on interest in surgery, research, and teaching has been a great asset during his formal training.

Originally from Wyoming and a high school valedictorian, Dr. Gorman graduated cum laude with a Bachelor of Science in Science Pre-Professional Studies from the University of Notre Dame before receiving his Doctor of Medicine from Loyola University of Chicago Stritch School of Medicine. During medical school, Dr. Gorman was nominated by the Department of Surgery as a medical student representative to the 2000 combined Orthopaedic Trauma Association/American Association for the Surgery of Trauma annual meeting for exemplary performance during his third year clerkship.

During his breaks from college and medical school, Dr. Gorman had the opportunity to shadow Dr. John Winter in both the operating room and his clinical practice.

Dr. Gorman has had the opportunity to present his total shoulder arthroplasty research with Dr. Crosby at both the Mid-America and AAOS annual meetings. This work also was recently accepted for publication in Techniques of Shoulder and Elbow Surgery. His foot and ankle research with Dr. Laughlin was published in Foot and Ankle International. He was named the Dayton Area Graduate Medical Education Committee resident representative for 2004-2005 and received Second Place for his work with Dr. Crosby on infection in total shoulder arthroplasty at the 2006 DAGMEC Resident Research Forum. He was elected to Wright State University’s chapter of the Academy of Medicine in 2006.

Dr. Gorman and his wife Megan welcomed their daughter, Tamsyn Grace, into their family in 2004. The family will be heading to California, where Dr. Gorman will begin a Kerlan-Jobe Orthopaedic Sports Medicine Fellowship in Los Angeles.
Annual Alumni Reception at the 2005 annual meeting.

The Department of Orthopaedic Surgery’s 4th Annual Alumni Reception was held at the Drake Hotel during the annual meeting. It was great to visit with alumni, friends, and family as the busy week drew to a close.

Presentations

Crosby LA. Complications of Total Shoulder Arthroplasty. Grand Rounds, Department of Orthopaedic Surgery, Wayne State University, Detroit, MI, October 2005.

Crosby LA. Shoulder Surgery, Wright State University Department of Education Clinical and Surgical Rotation, Dayton, OH, October 2005.

Iossi MF, Callaghan JJ, O’Rourke MR, Liu SS, Goetz DD, Vitetoe...

Lawless MW. Proper X-Ray Technique of Various Knee Exams. VA Radiology Department, Dayton, OH, August 2005.

Accepted for Presentation

Anderson C, Crosby LA. Evaluation of Accumulated Clavicle Plate against the 3.5mm LCDC Plate. Accepted Mid-America Orthopaedic Association 24th Annual Meeting, San Antonio, TX, April 2006.

Janout M, Booth BA, Laughlin RT. Fatty Infiltration of Gastrocnemius and Soleus Muscles following Achilles Tendon Lengthening. Accepted AOFAS 22nd Annual Summer Meeting, La Jolla, CA, July 2006.

Williams N, Kinzie M, Krishnamurthy A. Perioperative Factors Affecting Range of Motion after Total Knee Arthroplasty. Accepted Mid-America Orthopaedic Association 24th Annual Meeting, San Antonio, TX, April 2006.

Submitted for Presentation

Posters/Peer Reviewed Abstracts

Awards/Honors

Williams N, Kinzie M, Krishnamurthy A. Perioperative Factors Affecting Range of Motion after Total Knee Arthroplasty. MVH Resident Research Paper Award, 2005. First Place.

Grants

Crosby, SYNTHERES/AO International Educational Grant, 1997-2007. $5,000/Year.

Crosby LA. Exactech Corporation Research Nursing Coordinator Grant, 2006. $35,000

2. Wright State University School of Medicine Seed Grant, 2006. $8,744.

Prayson M, Manternach A, Heyse B. Sterile Tray. 1. MVH Foundation Grant, 2005. $2,000.

2. AORN Research Grant, 2005. $6,260.

2. Sensiba, Recipient, Miami Valley Hospital Limited Assistance Research Funds, 2005. $1,000

3. Sensiba, Recipient, Wright State University School of Medicine Seed Grant, 2006. $10,000

Research Projects in Progress

Ahluwalia J, Sensiba P, Iossi M, Mitchell R, Kinzie M, Laughlin
Dr. Laughlin Co-Authors Book

Richard T. Laughlin, M.D., is pleased to announce that his book, Fractures of the Foot and Ankle: Diagnosis and Treatment of Injury and Disease, co-authored with Jason H. Calhoun, M.D., was released to the public on March 29, 2005. According to the publisher Taylor & Francis, LLC, “With contributions from an established team of experts on the subject, this reference illustrates current practices and techniques in the care of patients with foot and ankle fractures—demonstrating treatment methods for fractures and dislocations, pediatric injuries, soft tissue management, crush injury, and post-traumatic reconstruction.” This text “provides step-by-step guidance on: ankle pilon, talus, and calcaneus fractures; tendon ruptures and lacerations; chronic infection, post-traumatic reconstruction, burns, amputation, and Ilizarov techniques; and Causalgia/Reflex Sympathetic Dystrophy.”

Dr. Laughlin has been with the Department of Orthopaedic Surgery since 1994 and serves as Residency Program Director, Associate Professor and Director of Foot and Ankle Surgery. In 1994 he completed the E. Burke Evans Foot and Ankle/Infection Fellowship at the University of Texas Medical Branch in Galveston, Texas under the direction of his co-author, Dr. Calhoun. Dr. Laughlin completed a Foot and Ankle Trauma Fellowship in 2001 at Harborview Medical Center at the University of Washington in Seattle under the direction of S.T. Hansen, Jr., M.D.

Dr. Calhoun is chairman and the J. Vernon Luck Distinguished Professor of Adult Foot & Ankle and Musculoskeletal Infections in the Department of Orthopaedic Surgery at the University of Missouri-Columbia. Dr. Calhoun is the author of more than 100 peer-reviewed journal articles and numerous books and book chapters in addition to holding several patents.

Dr. Lehner Elected State Society President

At the annual meeting in May of 2005, volunteer faculty and 1979 alumni James T. Lehner, MD, was elected President of the Ohio Orthopaedic Society. The Ohio Orthopaedic Society’s Annual Meeting was held in Columbus, Ohio at the Hilton at Easton Town Center. Holding its first meeting in 1940, the “Buckeye Orthopaedic Club” was founded in 1939 with a two-fold purpose that continues today: governmental policy involvement and technical professional advancement.

**SEND US YOUR NEWS**

We want to put you in next year’s issue of Orthopaedic News. Tell us about your career updates, honors, awards, publications, and personal highlights. Please send your information to: julie.knauff@wright.edu or fax to: 937-208-6141, ATTN: Julie Knauff

Mail to: ATTN: Julie Knauff, WSU Orthopaedic Surgery, 30 E. Apple Street, Suite 5250, Dayton, OH 45409
Their homes have grown by two feet...

Kadence Rose Hegyi
Staff member Jennifer Hegyi and her husband Jason welcomed Kadence Rose Hegyi on March 5, 2005, at 6:57 a.m. Kadence weighed a mere 1 pound and 10.25 ounces, and measured 13 inches long when she was born. The Hegyi’s were overjoyed to finally bring their little one home from the hospital two months later in May, where she has flourished into a healthy, happy, and active little girl.

Lauren Eva Grisoni
Dr. Nicolas Grisoni and his wife Jamie welcomed their second child on July 8, 2005. Lauren Eva Grisoni arrived weighing 7 pounds, 7 ounces, and measuring 19 1/4 inches long. Lauren was greeted by big sister Emma.

Radek Carl Janout
Radek Carl Janout made his first appearance on September 1, 2005, at 3:01 a.m., to the delight of his parents, Drs. Martin and Karen Janout. Radek weighed 8 pounds, 14 ounces, and measured 21 inches long.

Nicholas Mason Anderson
Congratulations to Dr. Chris Anderson, his wife Josie, and big brother Dane, who welcomed Nicholas Mason Anderson into the world on October 12, 2005. Nicholas arrived weighing 7 pounds, 3 ounces, and measuring 20 inches long.

Joseph Rubino
Dr. L. Joseph Rubino and his wife Leslie welcomed Joseph Rubino on November 10, 2005. At 7 pounds, 6 ounces, and 20 inches long, he was welcomed by his sisters, Caroline, Julia, and Elizabeth.

Brock Kenneth McDonough
Dr. Barry McDonough, Kendryn and Connor would like to introduce their newest addition: Brock Kenneth McDonough. Brock was born on March 17, 2006, at 12:13 p.m., weighing 8 pounds, 3 ounces, and measuring 19 3/4 inches long.

Mark Tyler Manternach
Alison Manternach, R.N., M.S.A., department research assistant, and her husband Jon welcomed Mark Tyler Manternach into the world on March 26, 2006. At 8 pounds, 5.6 ounces, and 21 inches, baby Mark will be in good company with big brother Luke.

CONGRATULATIONS NEWLYWEDS!

Gurpal (Jerry) Ahluwalia, M.D., PGY-3, wed Sarah Bloomfield on August 6, 2005. The ceremony took place at St. Francis DeSales Catholic Church in Cincinnati, Ohio, followed by a Cancun honeymoon.
Thank you to all those who made tax-deductible contributions to the Dayton Orthopaedic Medical Fund, a fund established to assist our residents in their training and education. All donations listed were made between May 2005 and April 2006.
