AAA

Please complete the application below.

Thank you!

2024 Research Affairs Student Summer Research Application - due date March 25th, 2024

The Summer Research Experience is from May 28th to July 19th 2024.

140 documented hours of research are required

First Name

* must provide value

Last name:

* must provide value

Your WSU email address:

* must provide value

Please provide your phone number

* must provide value

What is your University "U" number starts with U and then 8 numbers

(needed for payment of stipends)

* must provide value

Please provide an address where you can be reached in the summer of 2024

* must provide value

Which summer research experience are you applying for?

* must provide value

- Big Data Project (you are working with other students on a project using a de-identified database)
- Ongoing Project (you currently have a WSU affiliated mentor and project)

What makes you excited about this research experience and why?

And how will this summer experience help you achieve your future goals?

Please write a short paragraph for each question.

* must provide value

You have selected the Big Data Project

If accepted, you will be assigned a mentor and will be working in a group with other students on a de-identified database project. The mentor will select the project your group will be working on.

A maximum of 4 medical students will be accepted for the Big Data Group Project

Choose ONE of the following project datasets/ideas.

- National Youth Fitness Survey - Exercise and Education

You will be developing a research question and brief introduction that identifies a gap and significance, including citations. Attach your research question/brief information below.

Answers are listed with the database first, then the project idea

* must provide value

- National Survey of Children's Health - Breastfeeding and Covid
- National Survey of Children's Health - Home environment and language/behavior
- National Survey of Children's Health - ACES and school performance
- Midlife in the United States (MIDUS): A National Longitudinal Study of Health and Wellbeing - Predicting wellbeing
- Health and Retirement Survey - Dementia and covid
- Health and Retirement Survey - Diagnosis rates
- Other suggestion from the above databases

You have selected "Other" in the above question, please list the database and your idea for the project

Please upload your selected topic research question and a brief introduction that identifies gap and significance, including peer-reviewed in-text citations.

* must provide value

Please submit your CV or biosketch

* must provide value

I understand the expectations at the end of my project and that the second stipend will not be awarded until the following has been completed:

1. I understand that if I am not in good academic standing, defined as: "Needs to successfully complete MS1 coursework and exams before the program begins", I will not be able to participate.

2. I understand that engagement in this research project requires a minimum of 140 documented hours during the weeks of the summer project - verified by your mentor.

3. I understand that if selected, I will stay in the Dayton area to participate in-person for this research project.

4. I understand the requirement that I will write a reflective paper (1 page) submitted at the conclusion of the experience.

5. I understand the requirement to submit an abstract (max 250 words) at the conclusion of the experience

6. I understand that if I am unable to complete the requirements above, I will forfeit the the remaining stipend.

7. With successful completion of the summer experience, presentation of the research at the BSOM Research Symposium in the following April is strongly encouraged
